

2/11/2013 1:24

Inspired by Bruce Lipton's work on biology of perception and belief.
Put it up with iON words.
It's not genes that create our bodies and our structures.
Realized that when they finished up genome structure.
Only found 1/3 of the amount of genes they predicted.
Genetic world went into a huge tail spin.
Great to see that it isn't the genes, another science epigenetics, what is around the genes that effects them.
Lipton talked about the environmental signals to regular proteins that regulate RNA and DNA.
Protonome project comes to mind.
Magnazome - 3700 magnesium receptor sites on proteins.
Magnesium regulates proteins.
iON talks about Chromosome 14 being pivotal in RNA Drops.
Chromosome 14 - physical cut off from non-physical - activates and creates craving and addiction.
When you do not abandon your non-physical, the Chromosome 14 is activated and creates whatever we want.
Biology of Belief reinforces what iON says.
We are in charge of our own reality. We create our own bodies.
We create contrast for ourselves.
iON talks about cell receptors being fractal antennae.
On outside of membrane and receiving signals from environment. Everything is a signal.
Frequency and quality of signal of RNA Drops.
The cells create demand for amino acid chain that is going to make DNA ultimately.
Body will make its own amino acids and protein, and it will open cell and search for a gene that matches the demand.
DNA will replicate that.
Corresponding signal activates gene.
No connection with anyone else's reality.
When we fall, we connect with something. That is the electric spark.
Basic signaling is the beginning of falling into something.
That is the ecology. Then, you can connect without being hypnotized by them or co-dependent.
How much do you relate to anything?
Create something out of context until you share it with someone else.
iON says there is no lack, and your body responds perfectly right now.
Signaling is total play and there to delight you.
Contrast makes delight interesting.
Like Krishnamurti says.
Function of autonomic system is short and long term memory.

Memory is part of crystallization of signaling.
World isn't there unless you require it.
Loosening up the signaling connections.

12:47 Chromosome 14 words - Every human in remission is doing it through Chromosome 14.
Chromosome 14 is the pivotal point where we can soar or die - be less than or more than.
Dynamic symmetry of signaling among proportions.
Then, you create a protein.
RNA Drops is the catalyst.
When Chromosome 14 connects with the elements in the RNA Drops, it has a magnetic effect on Chromosome 14.
Chromosome 14 is a switchboard.
Mitochondrial snippers.
Everything has a service and a disservice.
If RNA Drops are magnetically charged, and they are, because they have super sugar into your saliva, you are taking the tuning fork of Chromosome 14 and plugging into the center of the magnetic, changes where mitochondrial snippers cut it off and replicated it continually, iON.
RNA Drops are the catalyst that triggers the processing of messenger RNA that goes to the DNA via Chromosome 14
If you want to make a shift in your body.
iON says there are two of everything - can switch both ways.
Can do you in or enhance you.
Mitochondrial snippers can go either way.
You set proportion based on what you brought to by your tension.
How much are you willing to allow bliss in your life?
Willing can be intention.
iON Chromosome 14 is where the memory or rememory of cell corrects the messenger RNA.
Chromosome 14 has a ring and cross.
For the scientists the ring is an anomaly; for us it's the answer.
Gone beyond science.
When something gets bigger and thicker, it gets lighter.

21:35 How does RNA Drops work on your spirituality?
Spirituality is an expression of your Godhood.
Come into your place of power where you have 144,000 double helix strands.
Spiritual gifts would be activated.
More non-physical than physical.
Non-Physical helps you have more experience.
Invisible, inaudible on another level; definitely spiritual.
Has tremendous effect on you.
If you need more, you imply less than.
Physical cuts off from non physical, you create problems for yourself.

RNA Drops for autism.
We can't say it cures anything.
RNA Drops make perfect cells.
Future cell production could be perfect and not connected by the labyrinth of your mind that keeps thinking you recreate your condition.
Can't make any claims for RNA Drops.
Scientists can't see how it's happening.

27:10 Clean out pipes, make salad dressing out of it. :)
Use dregs - to water plants with it. Interesting plant growth.
Caesar saladish.
Feeling good last time.
Then, had a tooth infection.
Went into old cleansing routine with sauna and eating light.
Effect month of serious cleanse in a few days.
Contrast of tooth infection led you to cleanse.
A few days was equivalent to a month and half.
Speeds up whatever I intend.
Putting back in some good.
Had a cold when I started.
Still drinking 3 cups of coffee a day and smoked.
Once I tried to help it, it was good.
Choose what the fastest path to your joy is.
Not have mind get in the way to tell us what we should or shouldn't eat.
Nothing wrong with a good infrared sauna.
Can do wonders. :)

30:50 ReNew is transdermal form of RNA Drops.
Car accident, got hit by a car walking down the street.
On RNA Drops when it happened.
Survived very well. Bruises. No broken bones or internal injuries.
Stiff neck and shoulder.
Little drop in my mouth after accident. Ran out in December.
Very surprised I came out with no internal injuries or broken bones.
Scar on my face on right side by my eye.
Ordered ReNew. Suggestions?
Intention is that scar will disappear.
Plenty of testimonials of skin and wound healing.
Be careful of focusing on it too much.
Face is difficult because you see it.
Talking about something on my nose and created something else.
Put it on and don't pay attention. Expect it to work and let it go.
Trust your prayers are going to be answered.
If you start second guessing, you negate.
How much are you going to allow?

If you want to go, you'll go.
Stiffness - take liquid ReMag and rub into stiff area.
Saturate injury.
Non-Physical said the accident is not a problem.
Your mind is powerful.
Chromosome 14 is outside and inside you. How big is the environment?
43:50 How does RNA Drops effects hip replacement?
Would it prolong the longevity.
RNA Drops and ReMag is what you do for a hip replacement.
I would be taking both of them for any hip replacement.
We don't have 20-30 year history to say that.
Drowsiness with RNA Drops.
People go through shifts - energized; then asleep.
RNA Drops may create some form of contrast.
Everything is individualized.
You can come into your own power, take care of your own world and your own health.
Less than situation is not what we are into.
Weeding out those who expect someone else to cure them.
iON doesn't like the word healing.
Bill, owner of Achieve Radio, calls it spirituality in a bottle.
He thought we were frauds for a whole year.
50:11 Roseanne's testimonial is amazing.
Up to us when we want to transition.
Every death is a suicide.
Had a relationship problem, had the car hit her to notice it.
Brought awareness to her.
51:32 RNA Drops are activating the deity in us.
Understanding cellular biology and interface with non-physical
Stem cell work is no different than RNA Drops.
Don't need authoritative team of doctors the remediation of any circumstance in your life.
Beyond the implications of health - creativity, mind function...
Beyond what a medical team can do.
The Great Physician has come.
Drinking non-physical.
You know you can be, do, have anything.
If they don't change who or what they are, even the stem cell will not stop things from coming back.
People may get another disease if they are so inclined.
They want problems to overcome them to get to Godhead.
None of the methods are the be all for anyone else.
Non-Physical - organ was diseased and now is eased.
Why do you have to cut your nails?
We are going to be heal anything.
Regrowing limbs in people.
Cell-8 has an effect of RNA and activate Chromosome 14...

directed to healthy cell replication.
I-Cell as conduit of communication.
