Ordered ReMag

Have a Parkinson type tremor in leg and arm.

Started on Parkinson's medication. Helps but doesn't go away.

No other Parkinson's symptoms.

It means neuromuscular. With that I go right for the magnesium.

Dosage on bottle to begin with. Some will take extra.

First thing to start with is ReMag.

Let us know how you do in a week of beginning, then we can talk about amount.

Blog talks about neuromuscular symptoms.

Huge magnesium deficiency.

Some people are taking 6 tsps a day. I'm not telling you that.

Varies depending on symptoms, highest doses with Afib.

If you take too much ReMag, you will get laxative effect.

Build up to the amount that takes away your symptoms.

Phone in every week and let us know how you are doing.
