Respiratory System and RNA Drops - skin, lungs, and sinuses  
RNA Drops change our cells to perfection. Then, we are done with it.

We don't have the labyrinth of the mind in the way of our cells being perfect.

Total Biology - skin is separation - skin problems or want skin improvements - skin reaction is caused by period of separation  
Rash can be healing of that separation.

By the time the symptom shows up in the body, the conflict already is resolved at the level of the brain. But have to resolve emotions.

By the time the symptom shows up, it's in a repair and acknowledgement phase. Saves the mind from repeating the conflict.

Partial resolution to keep body alive but does not resolve the conflict.

Total Biology says disease is resolving a conflict.

Body is trying hard to keep you alive. Chronic stress is a real threat to its survival.

Transition point to what we are doing here.

Important not to blame the body when something is going on.

Acknowledge that it's performing the way it's supposed to.

12:08

Eczema on son's face. Like watermelon.

Gone to doctors to get cortisone shots.

Child's face is almost completely cleared up on RNA Drops in 2 weeks.

Drops go around the labyrinth of the mind.

Every condition is at its origin a condition of separation.

It's all because we separated ourselves from our power.

Plenty of lung testimonials - Olympic athlete, swimmer, etc.

Lisa's partner's testimonial - miraculous wellness story

Many testimonials of people quitting smoking on RNA Drops.

ReMag/ReAline on the lungs.

ReMag necessary for muscle relaxation. Spasm of bronchials which is identified as asthma.

ReAline with methionine is the pre-cursor to glutathione. Lungs have huge amount of glutathione.

Two of the B Vitamins in the methylated form, which is natural.

Veggie clear capsule.

ReAline will suit everyone now.

ReLyte for the lungs - everything in the body is going to be perked up with the electrolyte formula.

Cells communicate electrically at the behest of the electrolytes and minerals in the body.

22:07

Would my blood effect the recipient when I donate blood as a person who takes RNA Drops.

23:00

Guy cutting himself with a knife, opening his package.

Went to the medicine cabinet and got a bandaid.

Walked off and forgot all about it.

3 drops of blood that were sparkly pink, hadn't gone brown or coagulated

25:21 Chills that are not comfortable.  
ReLyte I put iodine in the formula because people are so deficient.  
Drops have RDA form of iodine, ionic, 100% absorbable.  
Need electrolyte and building blocks.  
RNA Drops activates RNA through Chromosome 14 to make perfect cells in a natural formula.  
Cells creating in their fullness, they will need more electro-conductive material, i.e., minerals  
142 oz green juicing regime a day - minerals in the ground are depleted; don't think the minerals are in the food even if it is organic. ReMag and ReLyte are a great shortcut.  
Plus leaky gut may cause you not to absorb  
Would rather take something I know is absorbable. It's complete.  
Then, food can be for your joy.

32:04 Heart, skin cancer, and Type 2 diabetic  
Full time pacemaker - would it interfere with the RNA Drops?  
Pacemakers are placed in such a way that they pick up the slack from the heart's natural pacemaker.  
As cells get renewed with RNA Drops and ReMag, the pacemaker won't be needed.  
Taking colloidal silver - interfere with RNA Drops? No.  
Silver is used an anti-biotic in that form.  
Take silver periodically. Take it a month. Go off it a month.  
Don't want body to be dependent on it.  
RBC Magnesium Test [requestatest.com](http://requestatest.com)  
Someone with heart condition requires magnesium.  
[remineralize.org](http://remineralize.org) promotes use of rock dust in the ground.

45:55 Have a family history of low thyroid. Been on Armor 12 years.  
Low basal body temperature. Low dose - 1 gr.  
Had a sense of bliss, peace, and happiness.  
Had a lot of energy initially.  
Don't get locked into mass consciousness thought about sleep.  
Body was going through period of organization in April, possible thyroid and adrenal rebalancing.  
Body was having issues with fatigue. Hard time functioning day to day activities.  
Is it possible that I have a magnesium deficiency?  
1 tbsp of magnesium supplement, I wouldn't have laxative effect.  
Foot cramps.  
Ordered ReMag. 4 droppers in morning and 4 at night.  
Had best sleep I've had in weeks.  
Worked with the labyrinth of my mind with emotional stress.  
Total Biology on thyroid and adrenal.  
ReMag and ReLyte will be wonderful because new cells were taxing your magnesium stores.  
Need to get to the therapeutic effect before the laxative effect.

Thyroid is about keeping track of time in Total Biology.
