

3-24-14-2 0:01 Accident 8 years ago. Full rotator cuff tear addressed a year later. Torn deltoid muscle in your other shoulder.
Will the RnA Drops heal that?
Many testimonials on this subject.
The situation is that you take the Drops and you try to step away from the situation.
You have to detach your mind from thinking you are the same person you were yesterday.
The Drops are detaching your mind enough to allow your perfect cells to heal your body or you are put into another reality where the injuries aren't.
Nodule on bottom of her nose almost gone; back spasms from accident almost gone.
Discussion of PayDay.
Phone the same number as Dr. Carolyn's show.

5:21 Discussion about fasting.
I am attempting to do a semi-fast for 3 days.
I don't think my mind is ready for absolute fast.
Not sleeping well. Will order ReMag.
Should I add protein to the mix of vitamins and minerals.
Protein with RnA Drops because new cells need amino acids to replicate.
Dr. Carolyn not to keen on fasting.
Lemon juice, cayenne, ginger, and a bit of maple syrup powder with your supplements – most people can.
Some people are took toxic to detox like that.
When you are fasting, body is detoxing from your cells.
Toxins can recirculate.
Use good whey protein powder for one of my two meals.

8:48 Doctor who is a nutritional PhD regarding premature boy who has constipation.
Her pediatrician said pediatric magnesium is dangerous to the child.
ReMag has no additives, binders, or fillers.
What you are dealing with is magnesium deficiency – the baby is all tightened up.
Epsom salts baths – ½ cup in his little baby bath.
Midwives recommend for pregnant women.
Epsom salts are the premo treatment for pregnant women.
RDA for infants is 80-100 mg per day.
Pediatric doctor will say that magnesium is dangerous.
Dr. Carolyn feels that saying that is criminal.

11:15 Dog has epilepsy. Put magnesium in the dog's water.
The dog has had no problems.
She told the vet that's what she's done. Vet told her to stop.

12:18 Discussion of knowledge being political.
Defending identity and what they are willing to blame.

13:45 Dr. Terry Wood, <http://terrywooddvm.com>
His animals are having miraculous cures.
Just email Terry and ask if magnesium is safe for dogs.

16:07 Son with serious liver disease, kidney complication,
Neuropathy in feet.
Five prescribed drugs for various symptoms.
Have been giving him ReMag/ReLyte in his juices.
How radically are these meds going to deplete his
magnesium.
Put the various drug names into Wikipedia, and it gives
you a great chemical formula for the drug.
These drugs are not overtly magnesium robbers.
Liver and kidney damage are hard to heal. Hard for the body
to detox all the medications.
Son is 43 years old.
Perhaps you may be interested in a private consultation.

20:32 RnA Drops and Completement Products are food.
ReMag/ReLyte will go directly into your cells, they will
bump out toxins and heavy metals.
You gotta really research this stuff. You have to come
to alternative wellness and a place of self-responsibility.
When you replace cells, you are going to shake things up.

22:57 Is ReAline safe for cancer patients?
I read methionine can speed up and slow down the
growth.
Precursor to glutathione which is the most important
Anti-oxidant in the body.
Lots of factors about the products taken.
If you think this could be dangerous, don't take something.
Discussion about MTHFR gene mutation.
When you look at the details, you find out that the enzyme
that works with this gene is blocked by toxins from yeast
overgrowth. This can be broken down by magnesium.
Is this a gene mutation or a yeast overgrowth/magnesium
deficiency problem?
There's way more layers of chemistry and biochemistry
that is going on than anyone can find by googling.
If you step back from all the who, what, where, when, why,
how and believing scientists most of whom are paid by
drug companies.
You have to use your common sense and start asking
obvious questions.
You don't develop diseases and gene mutations rapidly.
It's epigenetic.
Developing a little fist full of products and give you the
right building blocks.
Use your intuition and decide whether you want to stay on
it.

30:14 Dr. Carolyn is not going to talk anyone into anything.
Completement products require everyone to take life one step at a time.
Sometimes detox symptoms come up. Then, things get better.
Suggest that people not be afraid of it.
Nothing to blame. You don't want to be a plastic human being doing a happy dance all the time.
Discussion about contrast. Body is talking to you.
What is your body trying to tell you?
Wheat Belly book, what do you think of gluten?
There is a level of being able to use magnesium to work with eating gluten.
Many people who took RnA Drops even though they were gluten sensitive – now they are not gluten sensitive.
RnA Drops help cells in people's small intestines by making the small intestines able to deal with gluten.
Discussion of hybridization of wheat.
When I was in Italy eating the pizza over there, I had no problem.
We should be able to adapt to gluten, but you do it very gradually and slowly, communicating with your body.

35:33 Epsom salts baths and autism
Magnesium in epsom salts spikes up insulin, leading to hypoglycemia.
Magnesium is absorbed in the skin.
Doesn't necessarily connect with hypoglycemia.
It's food. It knows how to work with your body.
This is looking at magnesium as if it was a drug.
Interaction between magnesium and drugs.
Medicine looks at that that the magnesium should be cut down not the drugs.
But the magnesium is a food and should not be cut down.
They are just turning magnesium into a horror show of concern.
For diabetic neuropathy they need magnesium.
See my blogs: Magnesium Is Not Dangerous, Diabetes Can Be Reversed, Diabetes More Costly without Magnesium, the Mercola YouTube about magnesium and its health benefits.
Also read my Compliance Blog
Get your Magnesium RBC test done, and then it's not a speculation.

42:48 My RBC was 4.8. I need to up my ReMag. I love knowing this as I don't take medication, and I still need more.

46:04 Do you think RnA Drops would help with severe neurological disorders like cerebral palsy.
Magnetic molecular energizer clinic has helped untwist

limbs.

With RnA Drops having a magnetic component, would it help and what dosage would you use?

Everyone should test for themselves.

Magnesium deficiency plays into cerebral palsy.

Trial bottle and see how you feel on all levels.

Testimonial of son who had cerebral palsy was given drops; improvement in appetite and speech patterns.

Kim's testimonial about using Drops for 10 months before her swollen glands all over her body subsided.

52:35

Retired nurse who is a graduated patient of mine.

She gave a copy of The Magnesium Miracle to her doctor.

Family doctor is married to her gastroenterologist.

Her husband had shared it with her.

They are all interested in naturopathic medicine.

Makes my day when doctors feel comfortable and share the information about magnesium.
